Save the Monarchs

These vivid fliers are also vital plant pollinators and their number have plummeted more than 80 percent in the past 20 years.

Butterflies lay their eggs on milkweed leaves as they are the only food the caterpillars and butterflies can eat. Road construction, utility corridors, urban development and other private, public land uses are eliminating milkweed that help their migration.

The National Wildlife Federation (NFW) and the US Fish and Wildlife Services have signed agreement calling on citizens to help in preserving

the Monarch by planting milkweed where they can. Find an area on your property whether you're a business or resident and plant this native plant. Be a partner in this endeavor. Check local gardening shops for plants.

Information was taken from National Wildlife Magazine. For more information visit National Wildlife Magazine (www.nw.org/pollinators) or Audubon Center for Native Plants (www.aswp.org).

Audubon Society of Western Pennsylvania has provided us with seed packets to help the Monarchs. Call 412-262-3620 to get your seeds. ♻️

Native Perennials

Success in gardens are made easier if you are able to plant plants that are native to your region. A list of some of the more popular perennials native to Western Pennsylvania are as follows:

- ◆ Alumroot
- ◆ Aromatic Aster
- ◆ Beebalm
- ◆ Black-Eye Susan
- ◆ Blue Lobelias
- ◆ Blue Wild Indigo
- ◆ Butterfly Weed
- ◆ Columbine
- ◆ Dwarf Crested Iris
- ◆ Ironweed
- ◆ Jacob's Ladder
- ◆ Joe Pry
- ◆ Millweed
- ◆ Narrow-Leaved Sunflower
- ◆ New England Aster
- ◆ Orange Coneflower

Bee Balm

Columbine

- ◆ Ox-eye Sunflower
- ◆ Perennial Phlox
- ◆ Summer Phlox
- ◆ Swamp Sunflower
- ◆ Coreopsis
- ◆ White wood Aster
- ◆ Wild Geranium
- ◆ Virginia Bluebells

When planting native perennials refurbish the ground with compost or good garden soil to ensure a beautiful garden and always purchase your flowers from a reputable garden center or nursery
